## STAINLESS STEEL TABLEWARE CARE AND HANDLING

While stainless steel is highly resistant to stains and corrosion even the finest alloys will suffer if corrosive food chemicals are not removed by proper soaking, washing, finishing, and drying procedures. Careful handling will prolong the life and luster of your stainless steel tableware.

1. Remove all food remnants immediately after use.
2. Presoak in a plastic or stainless steel pan using a nonabrasive presoak compound. Do not allow to soak overnight or for excessive periods of time.
3. Wash in hot water with a nonabrasive and noncorrosive cleaning agent.
4. Rinse in water at least 180 degrees Fahrenheit. A wetting agent or water softener may be required if using water of high mineral content.

## WARNING: LOW TEMP DISHWASHING!

If you are using a low-temp or chemical bath dishwashing process take great care in following the manufacturer's instructions. Improper use or faulty equipment will cause staining or corrosion of even the finest stainless steel.
