

WATER SYSTEM KITS

On-demand fresh, filtered, chilled "tap" water. Consider the savings and sustainability versus bottled water. Ready immediately, no need to store and carry inventory.

QUALITY AND PURITY

- Start with available tap water, then microfilter and purify, leaving the water better tasting and balanced with natural mineral salts.
- No prolonged exposure to plastic, which may leach harmful chemicals when exposed to high temperatures or sunlight.
- Enjoy the purity of 304 stainless steel faucets.

SUSTAINABLE SAVINGS

- Tap water costs less than bottled water.
- Eliminate packaging, transportation, and disposal / recycling of plastic bottles.
- Higher employee productivity due to time saved from stocking fridges and disposing of plastic bottles.
- Eliminate storage and free up valuable refrigerated space.

PART NO.	DESCRIPTION
H2O-CM-KIT	Water chiller / carbonator with 3 faucets (counter mount) Kit includes: 30' insulated barrier braided 1/4" I.D. tubing, water regulator and filter, water booster, high-pressure CO ₂ regulator.
H2O-UCM-LT-KIT	Water chiller / carbonator (under counter mount) Kit includes: 30' insulated barrier braided 1/4" I.D. tubing, water booster, water regulator and filter, high-pressure CO ₂ regulator and 10' trunkline bundle.
H2O-UCM-X-KIT	Water chiller / carbonator (under counter mount) with Xenia chrome tower Kit includes: single faucet with 3 choices, chrome tower, 12" dump drip tray, 30' insulated barrier braided 1/4" I.D. tubing, water booster, water regulator and filter, high-pressure CO ₂ regulator and 10' trunkline bundle.
H2O-UCM-M-KIT	Water chiller / carbonator (under counter mount) with Magic white ceramic tower Kit includes: 3 faucet white ceramic tower, 12" dump / drip tray, 30' insulated barrier braided 1/4" I.D. tubing, water booster, water regulator and filter, high-pressure CO ₂ regulator and 10' trunkline bundle.

COMPONENTS

PART NO.	DESCRIPTION
H2O-500	Water chiller / carbonator (counter mount)
H2O-R-F	Water regulator with filter
H2O-REG	Water regulator
H2O-FIL	Water filter, replace every 4-6 months, depending on volume
H2O-804	Maxi water boost system, 1/2" barb fittings
