IN-PLACE PORTABLE CLEANING

MICRO MATIC SANITIZING SYSTEM

We make it quick, easy and cost effective for any establishment to clean their own draft beer lines. This system can be easily installed in any beer cooler and allows convenient cleaning of draft lines wherever, and as often as needed. To clean the lines, couplers are removed from the keg and attached to a ringmain socket. There is a ringmain socket available to fit any style keg coupler. With a few easy steps, your draft beer lines will be clean and pouring fresh-tasting beer.
