

Polymer Dunnage Racks

NEW

Smooth top and rounded edges promote safe handling and protects against product damage. Open surface enables airflow, cleanability, and prevents bacteria buildup. Heavy-duty polymer construction gives racks the strength to hold up to 4,000 lbs. No assembly required. Multiple combinations enable custom storage space layouts. Racks can be loaded/unloaded easily from all sides. Withstands temperatures from -20°F to 180°F. Won't overheat or overcool. Antimicrobial additive protects against rust, corrosion, bacteria, mold, and mildew. Ideal to elevate products off of the floor in coolers, freezers, backrooms, food preparation, and storage areas. Polymer composition makes these racks resistant to rust, corrosion, and food acids. **Color:** Gray

Available in: ■ Gray
