STANDARD CONSTRUCTION SPECIFICATIONS

Exterior Finish: Stainless steel front and sides. Rear and bottom panels are constructed of aluminized steel.

Range Top: Each burner is a 33,000 BTU NAT (24,000 BTU LP) cast iron non-clogging burner (available in step-up). Removable flush top grates. Center-to-center measurements between burners not less than 12", side-to-side or front-to-back. Removable one piece, full width crumb tray provided under burners.

Gas Heat Control System: Each burner is controlled by a gas valve for independent control of flame. One standing pilot services each burner. A 3/4" rear gas connection is standard.

Legs: Stainless steel 4" adjustable legs.

UTILITY INFORMATION

GAS: Each unit has a 3/4" rear gas connection with a male NPT connector. Minimum supply pressure is 7" W.C. for natural gas and 11" W.C. for propane. All units require a regulated gas supply. Pressure regulator included. If using a flexible hose gas connection, the I.D. of the hose must not be smaller than the connector on the unit and must comply with ANSI Z21.69, providing an adequate means of restraint to prevent undue strain on the gas connection.
