for 6 Qt Tagine

WHAT IS HYDRO DIP WOODGRAIN COATING?

The Wynwood collection combines the warmth of natural wood with food-safe materials to alleviate issues when utilizing wood in commercial foodservice environments. Wynwood stands and servers include hydro dipped components such as handles and legs.

The hydro dip woodgrain coating is applied over metal to give a beautiful, natural wood appearance while remaining food-safe, easy to clean, bacteria-free, and warp-resistance in extreme temperatures.

Shown: Wynwood Stainless Steel Wok with Full Size Stainless Steel Stand.
