In addition to the already outstanding cabinet construction you have come to expect from Traulsen, these dependable reach-in hot food holding cabinets are built using our high performance ducted fan air distribution system. Unlike designs which simply radiate heat, this minimizes temperature stratification inside the cabinet, while providing for quicker daily start-up, lower energy usage, and reduced lifetime service costs. Each is supplied standard with easy to operate microprocessor controls, stainless steel exteriors, and are communications capable.

Specifications

Construction, Hardware and Insulation

Cabinet exterior front, one piece sides, louver assembly and doors are constructed of 20 gauge stainless steel with #4 finish. Cabinet interior and door liners are constructed of stainless steel (anodized aluminum in the A-Series). The exterior cabinet top, back and bottom are constructed of heavy gauge aluminized steel. A set of four (4) adjustable 6" high stainless steel legs are included.

Doors are equipped with a gasket protecting metal door pan, removable plug cylinder locks and guaranteed for life cam-lift, gravity action, self-closing metal, glide hinges with stay open feature at 120 degrees. Hinges include a concealed switch to automatically activate the interior incandescent lighting. Guaranteed for life, work flow door handles are mounted horizontally over recess in door which limits protrusion from door face into aisleways. Doors have seamless, polished metal corners.

Easily removable for cleaning, vinyl magnetic door gasket assures tight door seal.

Both the cabinet and door(s) are insulated with an average of 2" thick high density, non-CFC, foamed in place polyurethane.

NOTES

NOTE: Figures in parentheses reflect metric equivalents.

1= Please note that the available cabinet width narrows for 5-3/8" from the top of the door frame to 20-1/8" in order to allow for the heater fans.
2= For shipping weights and dimensions please refer to form TR35875.
3= Area of standard shelf compliment only, does not include storage area of additional shelves or available on cabinet bottom.
4= Heater is capable of operation from 208V to 240V as supplied standard. Actual amp figure will change at any voltage other than 208.
5= Figure shown for optional 115V.

Heating System

A low watt density, serpentine style, heater is employed for the generation of electric heat. Low velocity air is forced across its large surface area to efficiently move heat radiating away from these through a down-air distribution duct, where it is then evenly distributed throughout the cabinet, assuring the proper holding environment for hot food product, without drying. A vent, located at the top of the cabinet, is included for positive humidity control.

Controller

The easy to use, water resistant INTELA-TRAUL® microprocessor control system is supplied standard. Unit is NAFEM Data Protocol communication (NDP) ready. Optional hardware required to be NDP compliant. Third party software required for network connection. It includes a 3-Digit LED Display, ON/OFF Button, Fahrenheit or Celsius Temperature Scale Display Capability, One-Time Start-Up Temperature Adjustment Feature, and an RS485 data port. In addition it includes audio/visual alarms for: Hi/Lo Cabinet Temperature, Door Open and Power Supply Interruption.

Interior

Standard interior arrangements include three (3) wire shelves per section, mounted on pilasters. Shelves are full-width, and do not have any large gaps between them requiring the use of "bridge" or "junior shelves." Recommended load limit per shelf should not exceed 225 lbs. Optional tray slides may be purchased in combination with, or in lieu of these. Both standard and optional interior arrangements are completely installed at the factory.

Warranties

A three year parts and labor warranty is provided standard.
