EQUIPMENT SPECIFICATIONS

CONSTRUCTION, HARDWARE, INSULATION

Cabinet exterior front, one piece sides, and doors are constructed of 22 gauge stainless steel. Cabinet interior and door liners are constructed of anodized aluminum. The exterior cabinet back and bottom are constructed of galvanized steel.

Door self-closes at less than 90 degrees and also includes a stay open feature at 105 degrees. Gasket profile and Santoprene® material simplify cleaning and increase overall gasket life. Both the cabinet and door(s) are insulated with an average of 2" (5 cm) thick high density, non-CFC, foamed in place polyurethane.

REFRIGERATION SYSTEM

A balanced, rear mounted, front breathing, self-contained refrigeration system using environmentally friendly, non-flammable R-450A refrigerant is provided. It features a capillary tube, air cooled 1435 BTU, 1/4 hp, hermetic compressor, a forced air evaporator coil and a non-electric condensate evaporator. An 8' (2.4m) NEMA cord and plug is provided. Standard operating temperature for refrigerator models is 34° to 38°F (1.1° to 3.3°C).

INTERIOR

Standard interior arrangements include two (2) powder coated wire shelves per door, mounted on pilasters. These are adjustable in 1/2" (1.27 cm) increments, allowing for a minimum of 1-1/2" (3.81 cm) spacing between shelves.

WARRANTY

Both a three year parts and labor warranty and a five year compressor parts warranty (self-contained models) are provided standard.
